Thanks Denise, It sounds like the Fish and Wildlife Service sounds the best. The only issue is that we will probably be working later than 5pm, especially the lab. Maybe we could let ourselves out and lock up accordingly. We will not be starting before 0630. We all have cell phones and air cards so phone and internet hook ups are not essential. Thanks for doing the leg work on this. Jeff what do you think?

Subject: Command Post Plus - Cabo Rojo

Fish and Wildlife Service has an Office in Cabo Rojo. It is a nice place with all the commodities except internet access. They are willing to share office space within their main office, telephone, use of fax machines, a key to the main gate to park/pickup the vehicles and equipment. There is no direct access to their offices but the staff starts to arrive from 6:30 am leaving around 5:00 pm. Their location is 15 minutes from the center of Town. It is a remote place with no security guards but I don't think we need one in Cabo Rojo where crime rate is extremely low. We have access for this locale.

There is another spot at one of the entrances to the center of Town in Road 308/Int. Road 100. The National Guard Building. They can provide us with office and maybe parking space (they have a large fence/gated parking lot). No phones/fax/internet. They want a formal request in writing.

There is another spot in Town: a Museum open from 8-4:30 pm. They have a small library (hardly used) where you can use one of the tables and electricity for the laptop, nothing else. This space can be used during the day since they are in Town. I have to call back and/or make a formal request.

Fire, Police, and Civil Defense are very small and don't have office space to share. I inquire in a couple of other places but they didn't have any extra space. Please let me know if I should pursue final access with the National Guard or with the Museum.

--

-We have access to a lot of places in town except for some sites but we'll request access.

-Cabo Rojo Professional Dry Cleaners and D' Elegant Dry Cleaners are no longer in business. The latter was totally renovated, we may have to use GPS coordinates from previous sampling activities to locate the area of concern.

-The Police agree to give us support during the field work by removing their cars so we can sample as close as possible to Extasy Q-Prints and by providing support on the streets while sampling. We have to call them a week before we start our sampling activities.

-I have to organize my notes and share the information I collected from the wells with our hydro to select sampling points. I also took notes of some logistics that I'll share with you as soon as I can.

talk to you soon.
